**ASAP India certified as an ABB Robotics Partner in India.**

Bangalore India August, 2007 – ASAP India is pleased to announce certification from ABB Robotics as a partner in India for discrete material handling applications. Robotic palletizing is continuing to increase in popularity and ASAP India is excited about the opportunities for this application.

Certification from ABB Robotics allows ASAP Automation India to incorporate ABB Robots into complete design solutions for customers. ASAP India plans to set up a demonstration facility at their offices, allowing an up close look at the robot. As a certified partner, ASAP India will receive additional training and access to additional literature and support provided by ABB Robotics.

ABOUT ASAP India – ASAP India provides expertise in material handling integration, automation, and is a leader in providing supply chain execution (SCE) software and automation technologies. ASAP Automation India works with customers from various industries to conceptualize, design and develop automated material handling applications that optimize operations and improve efficiency.

ABOUT ABB Robotics - ABB is a leading supplier of industrial robots and the world leader in manufacturing robots. Over 150,000 ABB Robots have been installed worldwide. Key markets include automotive, plastics, foundry, electronics, pharmaceutical and food and beverage industries.
