Warehouse Control System RFP Template from ASAP Automation and Bastian (BMH) Released

Louisville, KY– ASAP Automation and Bastian Material Handling (BMH) are pleased to announce the release of an RFP template for Warehouse Control System selection.

To assist customers in the evaluation of providers in the growing warehouse control system market, ASAP Automation and Bastian developed a warehouse control system request for proposal template. The template allows customers to perform a non-proprietary evaluation on the major aspects of advanced warehouse control system functionality as well as provider background and experience. [Warehouse Control Systems](#) provide a real-time information link between automated material handling equipment and devices and a Warehouse Management System (WMS) or Enterprise Resource Planning (ERP) system to direct and manage handling and processing within a warehouse. ASAP Automation and Bastian Material Handling provide scalable warehouse control system solutions designed to improve efficiency and productivity. The warehouse control system RFP template can be downloaded from <http://www.asapauto.com/resources/downloads/default.asp>.

ASAP Automation is a leader in providing Supply Chain Execution (SCE) Software and Automation Technologies. The Exacta® software suite of products are designed to easily integrate with a wide variety of material handling automation technologies such as pick to light, pick to display, conveyor sortation systems, carousels, automated storage and retrieval systems (AS/RS), and inline scales and printers.

BMH is one of the countries largest independent material handling system integrators. They specialize in well engineered, value driven system solutions in manufacturing and distribution environments. BMH brings together best of breed equipment from the world's leading suppliers with in-house engineering, controls, and project management to ensure their customers' strategic business goals are met.
